

# Remodel your way to relaxation with **Hardt Construction**

**N**EED TO SWITCH UP the vibe at home? Hardt Construction Services (HCS) delivers the latest interior design trends to upgrade your home into a relaxation haven.

## Mood

The aesthetics of a home can have a significant impact on one's overall mood. For instance, using softer neutral-toned hues and natural lighting can contribute to a more calming environment. An improved layout can also enhance a sense of harmony in the home.

"Layout is the main factor when it comes to making the space fit you," says Michelle Hardt, co-owner of HCS. If a house is easy to navigate, more open and uncluttered — it can significantly improve peace of mind.

## Lifestyle matters

Utilizing unused space can give a sense of completion to your home — this could include converting a second bedroom into a home office or studio for your next project. With more people working from home and exploring personal projects, this has been a huge shift in renovation trends.

Michelle Hardt suggests, "Consider what motivates you, this will help in how you set up your space."

She continues, "Start with the basics, then consider what items will help with your productivity. Most importantly, remember it is your space so do what makes *you* happy!"

Whether you're designing a home spa area, yoga room, home office, or studio space for recording podcasts — the point is to design a space that both inspires joy and fosters your lifestyle goals.

## Textures

Texture and faux finishes are everything! These trends have been taking over the interior design market, from brick wall facades for a more rustic approach to gorgeous marble countertops for a more decadent appeal. Textures can be as simple as layering a beautiful plush rug over hardwood floors in your living room or bedroom for a cozier look.

## Outdoor bliss

Outdoor living rooms and entertainment spaces have been lighting up the market lately. You can utilize your outdoor space to kick back and relax by setting up an outdoor lounge with stylish and durable patio furniture. Bask in the morning sun while enjoying a cup of coffee or unwind with a glass of wine under a trellis and Italian stringed lights. Even create a personal spa area featuring an outdoor shower decorated with hanging gardens. The possibilities for outdoor relaxation are endless!

“These trends go beyond the season – what we’re seeing for fall is a great time to experiment and get creative with your home design.”

**Michelle Hardt,**  
co-owner of Hardt Construction Services

## All the feels for fall

Excited for pumpkin spice lattes and sweater weather? If you're looking to spruce up your home this season, Michelle Hardt recommends these fall décor tips and tricks to freshen up your home.

- Lots of texture in rugs, pillows, and throw blankets!
- Patterns.
- Curved furniture.
- Decorative cabinetry.
- Nature-inspired hues.

Get cozy for fall by adding seasonally inspired throw pillows; update other home décor items like centerpieces and photo frames for a fresh new look! Also, simple solutions like using mirrors to open a room can do wonders for the overall feel of your home.

"These trends go beyond the season — what we're seeing for fall is a great time to experiment and get creative with your home design," says Michelle Hardt.

## Go big or go home? With HCS, you can do both!

Have you been desiring a more open floor plan? HCS has the fix — they can tear down a wall or two while maintaining the integrity of the original building. Thinking of installing new built-in features to better accommodate your lifestyle? Perhaps a sleek wet bar to host friends for cocktails after work or a home theater equipped with the latest projector? Whatever your remodel goals are, HCS works one-on-one with clients to bring their unique design dreams to life. ■
